Exhaust Systems for the E60 5 series

Hartge exhausts are designed for the life of the car. Stainless steel is employed in all current model systems, whether a rear silencer or a complete system including metal catalysts and manifolds. Sport exhausts are primarily utilised in maximising the power output from the engine, but they also play a vital part in liberating a richer, deeper and a more sporty sound. All systems comply with noise legislation, and do not cause intrusive noise into the cabin. The standard system is not normally restrictive, but when the performance of the engine is increased, the capacity of the exhaust may be exceeded.

Rear Silencer, Dual Round Outlets. (Oval outlet also available).

Rear Silencers, Dual Ovoid Outlets left and right (M5). This illustration also shows the M5 equipped with lowered suspension and a set of 20" Hartge Classic 2 wheels
