## Exhaust Systems for the X5 E70

Hartge exhausts are designed for the life of the car. Stainless steel is employed in all current model systems, whether a rear silencer or a complete system including metal catalysts and manifolds. Sport exhausts are primarily utilised in maximising the power output from the engine, but they also play a vital part in liberating a richer, deeper and a more sporty sound. All systems comply with noise legislation, and do not cause intrusive noise into the cabin. The standard system is not normally restrictive, but when the performance of the engine is increased, the capacity of the exhaust may be exceeded.

Hartge stainless steel tail piece with dual round tail pipes left and right (including connecting pipe for standard rear silencer).

Hartge stainless steel tail piece with oval tail pipes left and right (including connecting pipe for standard rear silencer).

These pictures of the E70 also show the car equipped with 20" Hartge classic 2 wheels and sport springs
