B4 Dynamics Package 1, Z4 35is Retains Dynamic Drive

All technical work is undertaken at Birds facility in Iver, near Heathrow, with new engine management maps individually programmed and transmitted from the factory. All conversions are properly guaranteed for both performance and longevity. Only the best will do, and only available from Birds - Ultimate BMW Performance Tuning. Underlining our place at the cutting edge of tuning technology, all complete conversions carry comprehensive warranties of 24 months, without mileage limitation.

The B4 Dynamics Package 1 retaining Dynamic Drive consists of the following items. We will be pleased to revise specifications and pricing to your individual requirements.

Differential	Quaife ATB diff
Suspension	B4 Sport Springs
	<p>Suspension - The B4 Sport suspension springs retaining Dynamic Drive features suspension springs only that have been specifically designed and developed for UK roads. The bespoke springs are designed to match the Dynamic Drive shock absorber settings in Sport mode, and retain impressive slow speed ride quality in Comfort Mode. Our B4 shock absorbers can subsequently or alternatively added, and the Dynamic Drive option in the vehicle coding deleted, to prevent fault warnings.</p>

Quaife ATB Differentials - ATB differentials increase the torque presented at the tyre contact patch with the road, which increases the force exerted on the road, which, in turn, increases the rate of acceleration. In low grip situations, the standard "open" diff. allows one wheel to spin, triggering the traction control and limiting the engine power. The Quaife prevents the wheel with the least grip from spinning, traction control is therefore not triggered, and the car accelerates to it's true potential.

Options

Hartge 19" Ultima Wheels – Available in Sparkling Silver or Smokey Silver compatible with all of the factory traction, dynamic stability and puncture protection systems, and ride quality has been maintained by careful design and attention to installed weight of the wheel and tyre assembly. Fully compatible with any of the standard equipment, and of course with all Hartge equipment. Hartge wheels sets come with Pirelli or Continental with 245/35 & 275/30 high performance tyres, which eliminate the uncomfortable ride of the standard run-flat units. Hartge wheels sets are verified for the maximum speed of the car.

Brakes – Alcon Ø365x32mm curved vane ventilated and grooved discs for the front axle, featuring low weight alloy hubs, with a unique floating rotor system to prevent vibration and fade. Six piston alloy callipers for reduced weight and mighty stopping power. The feel and progression of these brakes allow fierce braking right up to the point of ABS actuation, both in the wet and dry. Fully protected against corrosion, and they work from cold right up to racing temperatures. The Z4 requires a minimum of 18" wheels.

Stabilisers - B4 anti-roll stabilisers complement the chassis balance and trim. Fast drivers will immediately note the prevalent under-steer inherent in the standard BMW chassis. As a consequence we provide significantly more rear stiffness than the front, biasing away from under-steer. Again, these stabilisers have been manufactured to our own specifications. These are not off-the-shelf close-enough specification items.

The U.K's Premier BMW Tuning Company.

Interior Accessories - Interior detailing, including aluminium alloy pedals, footrests, handbrake levers and gear lever completes any conversion to the tastes of the individual.

A note about tyres. All BMW cars except the M-Power cars are equipped with run-on-flat tyres from the factory. We cannot stress how important it is to rid yourself of these performance sapping devices. In our opinion, the arguments proposed by BMW for these tyres is totally misjudged, and we know of no customer who regrets installing conventional tyres. A second note..... All tyre brands do not perform similarly. Our recommendations are based on UK road conditions, and provide the best in wet weather grip and handling. If you want race style tyres, we can provide them.

As with all Birds Conversions, expert advice comes as standard. We treat all customers as individuals, and recognise that every individual has their own set of desires and criteria. We have more than 25 years experience in the BMW tuning arena, more than any other organisation in the UK, and know how to get the best performance from BMW cars. We are enthusiasts and are happy to discuss in detail every aspect of the performance of your car. Options are many, but please let us guide you toward Ultimate BMW Performance.
